MASTER OF SCIENCE IN PROJECT MANAGEMENT

Programme Overview

- The Master of Science in Project Management (MSPM) prepares professionals to lead and deliver successful projects in today's fast-paced world. The programme blends practical skills with global best practices in planning, budgeting, risk management, and leadership. Students gain hands-on experience using modern project management tools and approaches. Strong emphasis is placed on ethics, sustainability, and stakeholder engagement. Graduates are equipped to drive impact and results across public, private, and development sectors.

Target Group

- The Master of Science in Project Management (MSPM) prepares professionals to lead and deliver successful projects in today's fast-paced world. The programme blends practical skills with global best practices in planning, budgeting, risk management, and leadership. Students gain hands-on experience using modern project management tools and approaches. Strong emphasis is placed on ethics, sustainability, and stakeholder engagement. Graduates are equipped to drive impact and results across public, private, and development sectors.

Programme Duration

- 2 Years

Mode of Delivery

- The MSMS is delivered through a flexible blended-learning approach combining face-to-face lectures, online sessions, case studies, group discussions, practical assignments, and real-world simulations. Students gain hands-on experience and the opportunity to apply management principles to contemporary organisational challenges.

Admission Criteria (Entry Requirements)

- The Master of Science in Project Management (MSPM) is open to applicants holding a Bachelor's degree from a recognised institution in a relevant discipline such as management, engineering, social sciences, or public administration. Candidates with professional experience in project management, programme coordination, or related fields will have an advantage. Applicants must demonstrate adequate analytical, communication, and problem-solving skills, and may be required to complete bridging modules if their previous qualifications do not directly align with project management. Admission is subject to meeting Malawi School of Government and NCHE postgraduate entry requirements and the submission of all prescribed application documents.

Why Choose Our Programme

- The MSPM equips professionals with the skills to lead and deliver complex projects successfully. It combines practical experience with global best practices in planning, risk management, and stakeholder engagement. Graduates gain expertise in modern project management tools, ethical decision-making, and sustainable practices. The programme prepares students for leadership roles across public, private, and development sectors.
